

ELECTRICAL CONNECTION

Please disconnect the vehicle battery before installing or servicing your LED light. If in doubt, it is recommended to use the services of a professional installer. It is recommended to use the available corresponding Triple-R wiring kit for your product. If utilizing existing (non Triple-R) wiring, make sure to use the appropriate wire gauge and fusing in line with your lights.

CARBON-6 (2L-DT4-235)

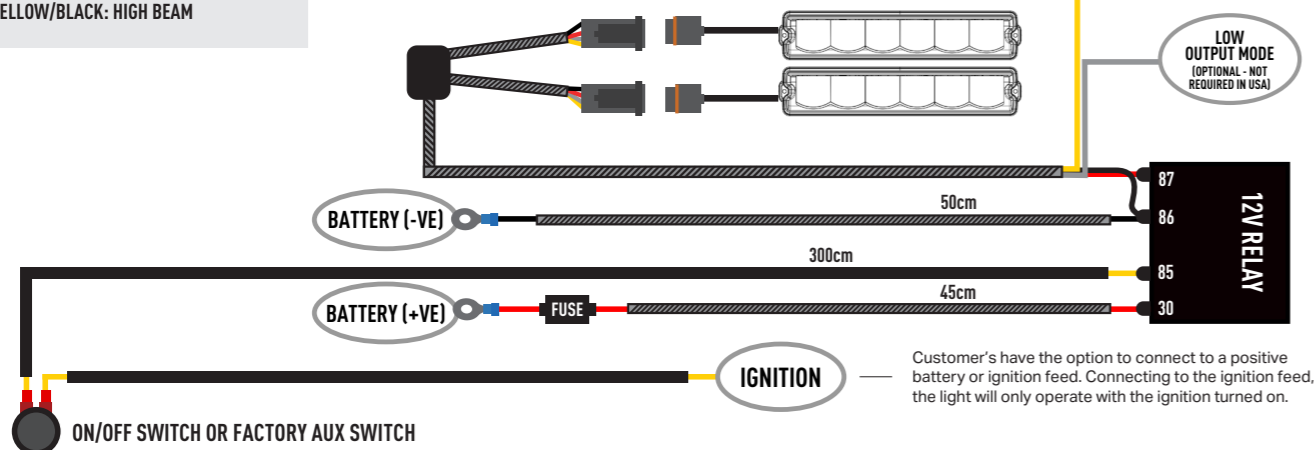

- BLACK WIRE: GROUND
- RED WIRE: POSITIVE
- YELLOW WIRE: DIP / LOW BEAM
- GREY WIRE: LOW OUTPUT
- YELLOW/BLACK: HIGH BEAM

ADD OPTIONAL MOMENTARY SWITCH (DIP / LOW BEAM MODE - PIN4)

If the hold time for the switch is $\leq 750\text{ms}$ then the beam pattern changes from **Default** mode to **Dip/Low Beam** mode and is retained after the switch is released. If the hold time for the switch is $\geq 750\text{ms}$ then the beam pattern changes from **Default** to **Dip/Low Beam** but, the mode will not be retained after the switch is released and it will revert to the previous state (default).

DIP / LOW BEAM MODE

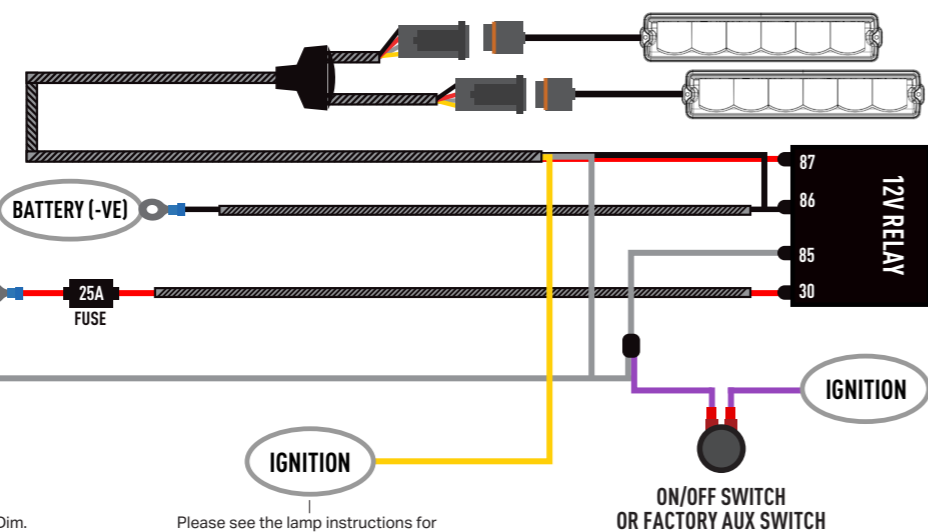

LOW OUTPUT MODE (OPTIONAL - NOT REQUIRED IN USA)

Customer's have the option to connect to a positive battery or ignition feed. Connecting to the ignition feed, the light will only operate with the ignition turned on.

CARBON-6 (YELLOW DIP) (2L-DT4-290)

- BLACK WIRE: GROUND
- RED WIRE: POSITIVE
- YELLOW WIRE: BACKLIGHT
- GREY WIRE: HIGH BEAM (WHITE)
- PURPLE WIRE: DIPPED BEAM (YELLOW)

Optional low output mode (white) available via Flash-To-Dim. See lamp instructions for further information.

Please see the lamp instructions for backlight color change options.
